

## Co2 Laser Machine

### Product Features

1. Our Laser machine adopts 64 DSP with touch screen display digital controlling technology. It offers function of successive, rapid and curved cutting, optimization of shortest processing path to create high efficiency and stability.
2. The newest software is matched to AutoCAD, CorelDraw and other graphics processing software for outputting original graphics. It defines engraving sequence freely to realize one time or whole output.
3. Professional accessories are provided for various processing. Honeycomb table is suitable for textile industry, aluminum blade table is usually used in advertising industrial, rotary is supposed to engrave or cut cylinder such as pencil vase.

### Technical Parameters:

Model	Eco			
Size	6040	9060	1390	1490
Working Table	Aluminum blade or honeycomb With Up/Down Table			
Laser type	CO2 Long lifetime catalyst sealed CO2 laser tube			
Laser power	60W/80W/100W/130W/150W/180W			
Rapid speed	600mm/s			
Resetting positioning accuracy	0.05mm			
Graphic format	CDR, BMP, JPG, DST, PLT, DXF, DWG, TIFF, PSD, AI			
Supported software	CorelDraw, Photoshop, Illustrator, AutoCAD etc.			
The smallest cutting characters	Chinese 2.0mmx2.0mm, English 1.0*1.0mm			
Power supply	AC220V/AC110V ± 10%, 50~60HZ			
Operating temperature	0~45 °C			
Operating humidity	5~95%( free of condensed water)
