

GAIN T 1313

Co2 laser engraving & cutting machine

Product Features

1. Our Laser machine adopts 64 DSP digital controlling technology. It offers function of successive, rapid and curved cutting, optimization of shortest processing path to create high efficiency and stability.

2. The newest software is matched to AutoCAD, CorelDraw and other graphics processing software for outputting original graphics. It defines engraving sequence freely to realize one time or whole output.

3. Professional accessories are provided for various processing. Honeycomb table is suitable for textile industry, aluminum blade table is usually used in advertising industrial, rotary is supposed to engrave or cut cylinder such as pencil vase.

Technical Parameters:

Product Model	GAIN T 1313, 6040-60*40cm
Volume &Gross Weight	1430*1000*1160mm / 280KG
Working Table	Aluminum blade or honeycomb
Laser type	CO2 Long lifetime catalyst sealed co2 laser tube
Laser power	60W/80W/100W/130W/150W/180W
Cutting speed	0-600mm/s
Engraving speed	0-1000mm/s
Resetting positioning accuracy	0.01mm
Graphic format	CDR, BMP, JPG, DST, PLT, DXF, DWG, TIFF, PSD, AI
Supported software	CorelDraw, Photoshop, Illustrator, AutoCAD etc.
The smallest cutting characters	Chinese 2.0mmx2.0mm, English 1.0*1.0mm
Power supply	AC220V/AC110V±10%, 50~60HZ
Operating temperature	0~45 °C
Operating humidity	5~95%(free of condensed water)

JUMBO PLUS 1610

Co2 laser engraving & cutting machine

Product Features

1. Our Laser machine adopts 64 DSP digital controlling technology. It offers function of successive, rapid and curved cutting, optimization of shortest processing path to create high efficiency and stability.

2. The newest software is matched to AutoCAD, CorelDraw and other graphics processing software for outputting original graphics. It defines engraving sequence freely to realize one time or whole output.

3. Professional accessories are provided for various processing. Honeycomb table is suitable for textile industry, aluminum blade table is usually used in advertising industrial, rotary is supposed to engrave or cut cylinder such as pencil vase.

Technical Parameters:

Product Model	JUMBO PLUS1610/1610D (1600*1000mm)
Volume &Gross Weight	2220x1860x1110mm / 700KG(Double head 720KG)
Working Table	Aluminum blade or honeycomb
Laser type	CO2 Long lifetime catalyst sealed co2 laser tube
Laser power	60W/80W/100W/130W/150W/180W
Cutting speed	0-600mm/s
Engraving speed	0-1000mm/s
Resetting positioning accuracy	0.01mm
Graphic format	CDR, BMP, JPG, DST, PLT, DXF, DWG, TIFF, PSD, AI
Supported software	CorelDraw, Photoshop, Illustrator, AutoCAD etc.
The smallest cutting characters	Chinese 2.0mmx2.0mm, English 1.0*1.0mm
Power supply	AC220V/AC110V±10%, 50~60HZ
Operating temperature	0~45 °C
Operating humidity	5~95%(free of condensed water)
